

Lithofin MN Care-Seal

Description

A special product from the LITHOFIN-Range for marble, natural and engineered stone (MN). Solvent free dispersion based on robust acrylates and hard waxes.

Technical Data:

Density: approx. 1,00 g/cm³

Appearance: liquid, whitish

Odour: unspecific

pH-Value: approx. 9 (concentrate)

Flash Point: n.a.

Properties

Lithofin MN Care-Seal forms a self-glossing protective film on the surface. This film enhances the appearance of the surface by refreshing the colour structure. The surface also becomes less sensitive.

Field of Use

For touching up and protecting polished marble and granite surfaces, which have become matt or dull. Also suitable as an initial treatment of rough and honed surfaces where a satin gloss is required. For occasional use on indoor surfaces.

Directions for Use

The surface to be treated and tools to be used must be clean and dry.

As initial treatment: dilute Lithofin MN Care-Seal approx. 1:5 with water, apply evenly with a cloth, sponge or lambswool wiper and allow to dry for approx. 30 to 40 minutes. The gloss level can be increased through polishing by hand or by machine. Absorbent or dull surfaces can be treated undiluted.

For touching up: occasionally use one cup of Lithofin MN Care-Seal per 10 litre bucket of wiping water.

Please Note: do not walk on the surface until the product has dried. On surfaces subject to heavy wear and tear, the treatment must be repeated from time to time.

We recommend occasionally cleaning with Lithofin MN Power-Clean in order to remove all product residues from the surface. Try the product in an inconspicuous area prior to use.

Coverage: approx. 20 to 30m² per litre when used as a sealant, up to 200m² per litre when used in wiping water.

Storage

Keep closed and cool. Frost-free. Shelf life of up to three years.

Further Maintenance

For regular maintenance use Lithofin MN Wash & Clean.

Environmental Protection

The contained surfactants are biologically degradable according to EU-regulations. Does not contain any phosphates.

Disposal: diluted product may be added to waste water. Containers are made of environmentally friendly polyethylene (PE). Clean containers can be recycled through collection system.

Safety

Contents: non-ionic surfactants; acrylates; polymers; auxiliary agents.

General Information: Keep out of reach of children. No health concerns once dry.

First Aid Procedures: remove contaminated soaked clothing immediately. No special measure necessary. In case of contact with skin wash off immediately with soap and water. In case of contact with eyes rinse thoroughly with plenty of water and seek medical advice. In case of ingestion, do not induce vomiting. If swallowed by mistake drink plenty of water and seek medical treatment.

Emergency Procedures: in case of spill or other release, take up with absorbent material (e.g. sand, sawdust, general-purpose binder).

In case of fire formation of dangerous gases possible. Product does not burn, fire-extinguishing activities according to surrounding.

Additional Information is listed on the Material Safety Data Sheet.

ADR2003: not a dangerous good.

Packaging

1 litre bottle with child-proof cap (10 per box)

Please Note: statements concerning environmental and safety issues refer to the product as delivered (concentrated).

This information should be considered to be informal and non-binding.

The products must be used according to local conditions and materials.

Where no previous experience is available, or in cases of doubt, test the product in an inconspicuous area. (GB11.04gps/5.03)
